

REFORESTING SCOTLAND JOURNAL

Back Issues

The Reforesting Scotland Journal, first called *The Tree Planter's Guide to the Galaxy* and renamed *Reforesting Scotland* in 1992, has always been at the heart of our activities and is now on its 37th edition. Over the years, the Journal has covered a wide range of topics (a selection listed below) with many articles as relevant today as when first published. Besides themed articles, there are regular spots, such as The Tree Planter's Guide (species featured highlighted in bold), Woodland report and Artists in wood.

Please note that back-issues are **available to subscribers at a reduced price**. By all means show this form to your friends but please ask them to contact the office for non-subscriber rates (or a subscription form!).

Details of the offer and an order form are overleaf. Place your order now!

1 Reforesting Scotland, reforesting the Earth; A better future for Scotland's native woodlands; Rhum Woodland Restoration Project; **The tree and its enemies - Weeds**; Local provenance nurseries and the law; The global greenhouse; The Loch Garry tree project
